DX NEWS OF INTEREST

Listen for Radio Free London every 1st & 3rd Saturday/Sunday each month on 3945 & 6400 kHz in parallel. The station broadcasts over a period of 24 hours twice a month on these two frequencies, w/the 3945 xmtr shutting down around 0800 UTC Sunday morning.

The Tasmanian based shortwave & FM pirate, Radio TechnoNet, has called it quits. The station's last broadcast was 9/6 after the ops received an e-mail message from Spectrum Management Authority (Australian version of the FCC) pointing out the illegality of their actions. Future plans are uncertain, but the station might return in a more legal fashion.

Free Radio Service Holland will celebrate their 16th birthday on 10/20. Programming will begin 10/19 around 2100 UTC somewhere in the 48 meter band. They also plan to be on 76 meters, perhaps 3910 kHz, the night of 10/19 to the 20th. FRSH was logged 8/11 on 6288 kHz & 7/28 on 6275 kHz so you might want to check that area for the 48 meter band frequency.

Now to clear up the confusion regarding the Alan Masyga Project. The original version of the station features music by The Alan Parsons Project only. If you hear a station with the same announcer playing a song or two by The Alan Parsons Project mixed in with music by other artists like Weird Al Yankovic, Smashing Pumpkins, Spinal Tap, Adam & The Ants, Nirvana, etc., this is the fake version of the Alan Masyga Project. Both stations QSL via the Providence, RI maildrop. I hope this helps you sort things out! Best of pirate DX until next month.....Deadline for November Dialogs: October 20th

Euros are back! It's true: Radio Marabu made it across the pond from a European site a couple weeks back. Both Joe Filipkowski and I heard 'em - not with great signals, but they were readable at times thru the noise. Information rcvd with my QSL card indicates the transmissions will continue on the following sked: 1st Friday 1800 to Saturday 1800, and 2nd Saturday 1800 to Sunday 1800, all times UTC. The frequency we heard 'em on was 6250, but they are planning to use 6240 kHz in the future to avoid that horrendous large Ute near 6250. Natch, last weekend I heard loud a RTTY sig on 6242; wouldn't ya know. BTW: the xmtr is an unspecified pirate in Italy..!

Another big change in the NA Free Radio scene: After completing four years of successful relays and original programs, NAPRS is closing their microphones for good. Dick Pistek credits all his good friends for the enjoyment he's gotten out of the hobby, and attributes "changing interests" and "too much competition (for airtime) from the likes of WARR and WPRS" for his reasons to quit. Good programs, good signals, good fun; you will be missed, Dick...

Received a request from the Op of WGLR, Green Lantern Radio: would the Op of Vo Bizzarros World please contact him via Box 1, Belfast..? Since both stations are offshoots of comic books, he thought maybe some collaboration might be in order...

Had an unusual thrill recently: A mid-day telephone call from Graham Barclay. A 37-minute call, at that. He wants you to know that his telephone numbers have changed; home is now 0064 6835 9186, and FAX is 0064 6835 4186. He plans to return to the air by mid-October, unannounced, on a Saturday evening (our time) perhaps 0700UTC. And he also states that Box 3103 is available for use by American pirates free of charge. Mail will be re-sent every two weeks...

Special Note from "microcaster" Bud Stacey: "Even though Box 907, Satsuma, AL, is not a maildrop, (he) will honor mail for 'Spin 96' until such time as the Op acquires a viable maildrop address." Bud sez that he's "willing to help in all ways possible but maildropping is not in the schedule..."

Kindly update your QSL totals during early October; The Stats run again in November...

NIGERIAN CLANDESTINE CHANGES NAME

VOA HEARD DURING KUDIRAT TRANSMISSION

Radio Democrat International, the anti-Nigerian government English language clandestine, has changed its name. Since at least August 29 the station has been giving an ID of Radio Kudirat Nigeria, the Voice of Democracy. It still operates on 6205 kHz every afternoon at 2100 UTC for an hour. The transmitter actually signs on the air about 2 or 3 minutes before 2100. BBCMS (via *Monitoring Times*) reports that the name honors the late Kudirat Abiola, who was the wife of Moshood Abiola, who is assumed to have been the winner of the June 12, 1993 elections that were canceled by the current Nigerian military government.

We have several logs of the station. ACE member Vince Havrilko heard them on both August 25 and August 30 for about 15 minutes before their sign-off at 2200. Vince reports that both shows were still giving the ID of Radio Democrat International. This suggests that for a few days in late August at least, the name change of the station was erratically implemented. Vince heard male and female announcers with time checks, African pop and reggae music, and political discussions of Nigeria. Vince had fair to poor signals on both transmissions. In fact, Vince reports that some days he can't hear them at all from Florida. Signals are much better in Cleveland; I can hear them on a daily basis. On the August 30 broadcast, they were giving the UK and Boston QSL addresses, which they still do on a daily basis. In case you have lost these addresses, they are proving to be good for QSL purposes. Both are c/o NALICON. In the UK, NALICON uses Post Office Box 9663, London SE1 3LZ, England. In the USA, it uses Post Office Box 175, Boston, Massachusetts 02131.

One of my own loggings of Radio Kudirat Nigeria is quite interesting. On September 15 I tuned in to hear their sign-on at *2057 and listed to 6205 kHz until their sign-off at 2200* UTC. I was startled to hear the first two minutes of this transmission, which was a foreign language service of the Voice of America I couldn't make out the language; possibly it was Middle Eastern or Eastern European. A female announcer gave the VOA identification and frequencies. Some Yankee Doodle instrumental music followed. Then, abruptly at 2059 UTC, the show switched to African drums and the regular sign-on of Radio Kudirat Nigeria. The announcer gave the 6205 kHz frequency and said that the program was heard at "10:00 every evening." A show of Afro-pop music and Nigerian political commentary followed. At the end of the show, the announcer gave the UK and Boston addresses, inviting correspondence from listeners.

I was quite surprised to hear the Voice of America programming for two minutes from Radio Kudirat Nigeria's transmitter. There are two possibilities. On the one hand, this might clearly indicate that there is a relationship between the United States government and Radio Kudirat Nigeria. On the other hand, it is possible that the two stations are simply using the same satellite feed to reach the Meyerton transmitters in South Africa (see last month's ACE for confirmation that this is the transmitter site, including the URL on the World Wide Web of <http://www.sentechn.co.za/meyerton.html> where you can actually see pictures of the transmitter used by the clandestine for its shortwave relay). It could be that some technician pushed the button two minutes too early for the Kudirat broadcast, inadvertently airing the VOA programming. Or, even more likely, the transmitters are probably programmed to automatically operate according to a scheduled sign-on. It could be that the programming is two minutes off in this case. In any event, the suggestion of a possible link between the USA government and Radio Kudirat Nigeria is quite thought provoking.

ACE member and Cumbre DX wizard Ullis Fleming of Maryland sends in additional evidence for a possible

link between the United States government and the Nigerian clandestine. On September 9 the Xinhua news agency filed a story, "Nigeria Accuses U.S. of Being Involved in Fugitive Radio Station." Xinhua reported that a press release from Nigerian Honorary Minister for Special Duties Alhaji Wada Nas said that Kudirat has "consistently served as a forum for futile and unwarranted attacks on the government and people of Nigeria." Nas claimed that he had documents that implicate the United States Information Service "in a failed attempt to recruit a broadcaster in Hausa language (Bruce Copehed) for the fugitive radio station." Nas also said that "the government is in the process of uncovering the transmission base of the fugitive radio station," saying that the location would be exposed in a few days. I guess that the Nigerian government does not subscribe to *The ACE*, since the September "Clandestine Profile" precisely identified the transmitter site.

BBCMS confirms the fact that the Nigerian government has alleged that the United States Information Service has been recruiting announcers for Kudirat. In a broadcast of Radio Nigeria from Kaduna in English on September 8 at 1700 UTC, BBCMS says that the station claimed that Bruce Maharts of USIS in Kaduna, Nigeria was caught preparing travel documents and a letter of provisional appointment for a Kudirat broadcaster. Radio Nigeria did not mention Bruce Copehed's name, however.

BBCMS points out that during its September 9 broadcast, Radio Kudirat Nigeria reported the Nigerian government charges, and denied them. Kudirat referred to Alhaji Wada Nas as the Nigerian Special Duties Minister. The station said that a Radio Kudirat spokesman "dismissed Wada Nas' statement as absolute nonsense." Kudirat did say that they had begun a Hausa language transmission, and that "listeners' response from the Hausa-speaking areas of Nigeria has been overwhelming."

So, is the USA financing or supporting Kudirat? In addition to the press accounts of the Nigerian government charges and Kudirat's denials, we have my logging of September 15 where two minutes of VOA programming were definitely broadcast from Meyerton on 6205 kHz just before the regularly scheduled sign-on of Kudirat. Circumstantial evidence is beginning to pile up that we may have a case here of your tax dollars at work.

WASHINGTON POST IDENTIFIES CIA SPONSORED IRAQI CLANDESTINES

A front page article in the September 15 edition of the *Washington Post* identified multiple anti-Iraq clandestines as CIA operations. This very lengthy analysis was prompted by Saddam Hussein's recent military victories in the northern Kurdish regions of Iraq, in which USA-financed Kurdish factions split among each other. Saddam suddenly allied with the Kurdistan Democratic Party, leading a CIA team to flee its base in Irbil, Iraq on August 28.

According to the *Post*, the CIA spent \$100 million in an attempt to organize Kurdish opposition that might eventually oust Saddam Hussein. Although this huge sum funded diverse operations, "communications gear" and "broadcasting equipment" were among the items funded.

The *Post* said that the Voice of Free Iraq was operated by the National Accord, a CIA-sponsored opposition group to Saddam Hussein that was operated by former Iraqi intelligence chief Ayad Alawi and former Iraqi information minister Salah Omar Ali Tikriti. The *Post* says that this clandestine used a transmitter in Saudi Arabia, but that the political group fragmented when Alawi and Omar Ali split in 1991. BBCMS, in its recent clandestine summary of broadcasts to the Middle East and North Africa, says that the current version of this one uses an ID of Republic of Iraq Radio, Voice of the Iraqi People. BBCMS points out that the station has announced that they use government transmitters in Egypt, Syria, and Saudi Arabia for shortwave and medium wave operations. BBCMS has spotted their programming on the Arabsat 1C satellite. Other IDs used by this one during the Gulf War in 1991 were the Voice of the Iraqi Opposition and the Voice of the Iraqi People. BBCMS says that although they have not confirmed it, many press accounts have alleged that they currently use transmitters in Saudi Arabia.

The *Post* also says that the Iraqi National Congress, headed by Ahmed Chalabi, began operating anti-Saddam radio and TV stations in 1992. The *Post* does not identify the name of the stations. But, BBCMS says that the INC broadcasting organization is called the Iraqi Broadcasting Corporation, produced by IBC Communications Ltd. in London. IBC still has a London office, but BBCMS says that their headquarters is in Salah al-Din in northern Iraq. According to BBCMS, they use a "powerful medium wave transmitter" in

Egypt to transmit the Voice of Iraq. This station used to be relayed by the Voice of the People of Kurdistan. It also carries shows from Radio Freedom - News Center of Free Iraq, Voice of the Free People of Iraq, and Iraqi Army Radio. The Egyptian transmitter also carried the Voice of Human Rights and Freedom for Iran, which we have linked to the CIA in the ACE Clandestine Profile on several occasions in the past.

BBCMS reported that Iranian radio said on September 2 that Iraqi military forces silenced "the radio and television station of the Iraqi National Congress" after they seized the town of Arbil in the Kurdish part of Northern Iraq. BBCMS reports that the IBC headquarters is still in Salah al-Din, but that they maintain an office in Arbil.

BBCMS says that the Kurdistan Democratic Party, headed by Mas'ud Barzani, operates the Voice of Iraqi Kurdistan. The KDP is the group that suddenly allied with Saddam Hussein to fight other Kurdish factions in August. This one is heard on shortwave and medium wave. The *Post* says that it also received CIA funding in the past.

The Iraq clandestine front has always been confusing. But, given the *Washington Post* article, we now know that quite a few of these stations have been closely linked to the CIA, and that your tax dollars have been at work funding program production and transmitters for all of the stations listed here. The recent sudden turn of military events in the Kurdish parts of northern Iraq have flushed the CIA operation into the open on the front page of the *Post*.

MORE ON REPUBLIC OF TEXAS VIA GIGI LYTLE

ACE member Gigi Lytle of Texas sends in a bundle of additional clippings on recent activities of the Republic of Texas movement. This is the outfit that claims that Texas never officially entered the union, and thus is still a republic independent of the USA. They became notorious when they announced plans to operate a 50,000 watt medium wave transmitter from Texas under the Republic of Texas jurisdiction. While nothing new has surfaced on the potential pirate/clangestine, and while my e-mails to Republic officials have still not been answered, Gigi finds that the movement has been active. The *Lubbock Avalanche-Journal* noted that the Republic of Texas announced that they would transfer state of Texas assets into Republic bank accounts, but Ron Dosek, spokesman for Texas Attorney General Dan Morales, said, "The Republic of Texas has no more authority than the Moose Lodge." The *Lubbock* paper ran an AP article reporting that the Republic of Texas secretary of defense Thomas Ralph Turner notified the United Nations on August 19 of its official flag and military insignia. Morales also issued an opinion ruling that "People's Courts" established by the Republic of Texas were invalid. The movement also generated coverage of its common law court system in *The University Daily*, which I believe is the campus newspaper of Texas Tech University, right Gigi?

OTHER CLANDESTINE NEWS

We have a few items of clangestine news from BBCMS via *Monitoring Times*. First, the Voice of the People of Kurdistan has been using 4025 kHz at 1528-1555+ UTC. This one attacked the CIA-sponsored KDP and its leader Mas'ud Barzani. BBCMS says that their transmitter has been in Sulaymaniyah in northern Iraq since October 1992, although it has been on the air since 1988. The station was off the air between September 9 and September 15 when the KDP took control of this city, and is presumed to operate from a new transmitter elsewhere in northern Iraq now.

In Angola, VORGAN (the Voice of the Resistance of the Black Cockerel) is now scheduled from 0450-0900 on 9755 kHz, from 1150-1530 UTC on 11830 kHz, and from 1650-2100 UTC on 7100 kHz. BBCMS says that this one still supports the National Union for the Total Independence of Angola (UNITA), an opposition group led by Jonas Savimbi. Most shows are in Portuguese.

BBCMS says that Radio of the Provisional Government of National Union and National Salvation, the Khmer Rouge station in Cambodia, has been erratically heard lately. But, it has been noted at 0900-0940 UTC on 5407 kHz. This one should be a possibility for us to hear, now that winter reception conditions are returning. Finally, although it has nothing to do with clangestines, the FCC shut down an FM pirate using 87.9 MHz from Toledo, Ohio on August 14. A name that will bring back memories to longtime ACE members, Artie Bigley, says that WGTE (91.3 MHz) had the station busted by Charles Hawkins of the Detroit office of the FCC. Television station channel 13 ran two reports on the bust, according to Artie.

GET WELL ALAN

Our regular contributor Alan Masyga of Minnesota writes in this month to report that he's been under the weather, and thus has not had as much chance to DX lately as he usually does. We all hope that Alan is feeling better, and that his clangestine findings return to these pages in the future.

GROVE COMMUNICATIONS EXPO

Judy Grove of Grove Enterprises sends in the latest news about the 1996 Grove Communications Expo. It's scheduled for October 18-20 at the Atlanta Airport Hilton in Georgia. Registration is \$55, or \$45 if you've never been to a previous event. Banquet tickets are \$29.95; the speaker is NASA astronaut and astronomer Ron Parise, WA4SIR. Hotel rooms go for \$76 per night. Once again this year, your columnist George Zeller will be hosting a discussion of pirate and clangestine unlicensed broadcasting at the event, which also covers shortwave broadcasting, utilities, scanning, satellite monitoring, and amateur radio. If you're coming to Atlanta, I'll look forward to meeting you there. If you want to make a reservation, a toll free telephone number is available at (800) 438-8155. On the web, <http://www.grove.net/hampgexpo.html> has additional details on this year's convention.

THANKS!

Once again this month we thank several DXers who submitted material direct to this column, including Vince Havrilko (Florida), Ullis Fleming (Maryland), Gigi Lytle (Texas), Alan Masyga (Minnesota), Artie Bigley (Ohio), Judy Grove (North Carolina), and George Zeller (Ohio). Next month we all hope to hear from YOU

by October 20 for the November ACE Clandestine Profile.

ASSOCIATION OF CLANDESTINE RADIO ENTHUSIASTS

P. O. Box 11201, Shawnee Mission, KS 66207-0201

The A*C*E is an association of individuals who find pirate, clandestine and covert communications an interesting part of their radio listening hobby. The primary existence of the club revolves around the publication of a monthly bulletin. The A*C*E. The bulletin reports on pirate, clandestine, covert and other unexplained broadcasts. Also, the readers are provided with other available material concerning motives, explanations and theories behind these various broadcasts and broadcasters. The ACE as an organization, does not encourage, support or condone any illegal activity; we simply seek to understand the nature and reasoning behind such broadcasts. If your interests include listening to pirate radio stations, clandestine broadcasts and covert communications, The A*C*E is for you!!

All subscriptions, renewals, and queries regarding subscriptions should be sent to the above club address. Contributions for each editor should be sent to their own given addresses.
